Re: Ascent Consulting

Division 5, LLC is a structural steel and miscellaneous metals contractor for the commercial construction market. The company was started in 2013 and have grown substantially over the years in sales and staff. We sought out a consulting firm to reorganize and implement new practices and procedures and guide us into selecting a construction project management software to transform the way we do business.

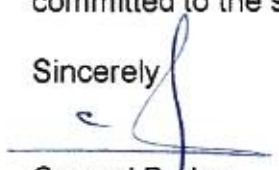

Ascent Consulting was hired to take us to the next level, and they did that!

It was a pleasure to work with Jeff and Carol. They took time getting to know our workplace culture, which consists of a diversified team, and how important it is for us to have a positive work environment. They were patient, understanding and knowledgeable. Jeff reviewed every aspect of our business and provided us with customized processes for each department to execute. This allowed us to streamline and identify opportunities to sustain our growing business.

We are now up and running on a fully executed construction project management software, we have identified roles and responsibilities for each position and the process diagrams to streamline the workflow and we are utilizing the customized strategic growth calculator Jeff created for us. This has allowed us to keep track of our projects, sales and manpower.

I highly recommend Ascent Consulting! They are knowledgeable, professional and committed to the success of your company.

Sincerely,

  
Conrad Barker  
Managing Director
