

EDGE ELECTRIC

Edge Electric
100 Precision Drive
Suite 205
Buda, TX 78610

To whom it may concern,

I am Sandra Johnson the President of Edge Electric. We started working with Ascent because we want to create processes that are clearly defined, streamlined and scalable. Further, we wanted to improve our bottom through strategic project management. Ascent spent an entire week, onsite, getting to know our team and diving deep into our current processes and procedures. Within one month Ascent delivered a thorough assessment of the business and detailed suggestions organized by priority and difficulty. We're looking forward to working with them on implementation!

The project took place over the course of approximately five weeks. Ascent's scope included a series of onsite workshops conducted across a 3-day period with particular focus given to Edge's Procore usage and integrations, anticipated ERP migration, and expansion plans. Ascent then authored a detailed "Comprehensive Operational Assessment" report examining over twenty facets of Edge's business presented alongside custom recommendations.

This work, along with the help Ascent provided, allowed us to pinpoint our strengths and weaknesses, allowing us to plan for growth and success!

We are so happy that we contacted Ascent to help us restructure our business in preparation for scaling nationwide!

Sincerely,

A handwritten signature in black ink that reads "Sandra Johnson". The signature is written in a cursive, flowing style.

Sandra Johnson, President
Edge Electric
